General Information about canoe trips

When you see how the sun vaporizes the fog on the lake in the mornings or when you're paddling down the river, then you discover this feeling of gliding, this feeling of floating on a pillow of air which you can only experience on a northern river or lake. Take off and glide through this blue morning paradise.

We want you to experience a canoe trip exactly like this with us and to offer you a very special adventure. Therefore we have limited our groups to a maximum of 5 participants and we guarantee the tours already with one person (except Wind River Tour). We do not have any fix tour dates. It is all your choice. We want everyone to experience the beauty of this country in a relaxed and peaceful atmosphere. Team spirit is needed at camp. Everyone helps each other so an individual group is established.

Schedule of the trips

After your arrival in Whitehorse we will meet you and accompany you shopping then bring you to our home (1 ½ hours drive) on the South Canol Road. Here you will find a cozy cabin awaiting you. Then together with the other participants you can discuss your forthcoming adventure. During the next 2 days you have time to get used to your surroundings and to practice with your canoe on the nearby lake (only 3 minutes away). We introduce beginners to the basic knowledge you need to canoe and experienced canoers can refresh their skills and perhaps learn something new. During these 2 days you can check your material and become familiar with everything.

Then we can start. We drive to the starting point of the trip. After we have stored our materials in the canoe and pushed off from the bank we can immerse ourselves in the fantastic wilderness of the Yukon. We show consideration for the delicate ecology of this country. Then fantastic days follow with a variety of experiences and impressions. Feel the breath, it will remain with you for a long time.

Requirements

Our trips are designed so that everyone in good general health can cope with the daily pensum without problems. We have planned enough time within our trips so we aren't pressurized or stressed. None of the trips on offer need a high standard of canoeing skills. We can arrange appropriate training at the beginning of every trip and you have enough time to practice what you have learned.

Safety

A satellite phone is taken on every trip and maps, compass and GPS as well as standard rescue and first aid equipment. Safety is the most important issue for us, so that you can devote yourself to the beauty of the country and enjoy your vacation.
